HENRIQUE MOREIRA

AI Solutions Consultant | AI evaluation & EU governance | B2B operations

Espoo, Finland | +358 40 143 6351 | hqe.moreira@gmail.com | LinkedIn | henriquemoreira.eu

PROFILE

B2B commercial professional with 18 years in European customer and sales operations at Metsä Board, now building and evaluating AI solutions for real business processes. I design, build and publish working prototypes: GRYPS (connectivity resilience scoring), Triangora (multi-agent fact verification with a written methodology and a defined abstention outcome) and Morea (an EU AI Act Article 4 evidence walkthrough). I combine customer-facing judgement with a focus on what makes AI output trustworthy and compliant.

CORE SKILLS

AI solutions: business process analysis, LLM application prototyping, prompt engineering, AI workflow automation

AI evaluation & governance: verification methodology design, source-independence analysis, adversarial review, abstention rules, EU AI Act and NIS2 awareness

Commercial: enterprise account planning, pricing and negotiation, commercial analytics, cross-functional delivery, CRM adoption

Tools: Mistral API, Neon, Vite, React, Vercel, Power BI, SAP; Microsoft Power Platform and Power Automate (PL-900 and PL-200 in progress)

SELECTED AI PROJECTS

- **GRYPS** (Model v0.4): connectivity resilience scoring for Nordic and Arctic remote operations such as forestry, mining, maritime and energy. Scores satellite dependency and redundancy gaps across LEO, MEO and GEO providers and produces a Resilience Signature, linked to NIS2 and CER readiness. gryps.vercel.app
- **Triangora**: multi-agent fact-verification prototype that checks submitted intelligence and never generates it. Four controlled roles (claim examiner, independent evidence investigator, adversarial reviewer, adjudicator) test each claim against independent source families; a claim is verified only when two independent families support it, otherwise the system abstains. Methodology written before the agents run. triangora.vercel.app
- **Morea**: educational walkthrough of an EU AI Act Article 4 Evidence Pack. morea-pack.vercel.app
- **Earlier prototypes:** Grantemia, Velu, Lycaon, DisclAI, Iraun. Non-commercial, built to demonstrate skills. Portfolio

PROFESSIONAL EXPERIENCE

Sales Manager – Commercial Excellence & Customer Solutions 01/2018 – 05/2026
Metsä Board | Finland

- Grew sales volume in Portugal by **+9.84% on average per year** through structured account planning and customer development.
- Raised average selling prices by **+2.97% annually** in volatile markets, and delivered **+4.26% annual price growth** across international agent markets through negotiation.
- Partnered with enterprise customers to understand their processes and deliver solutions that supported long-term outcomes.
- Used generative AI tools to automate commercial analysis, proposal preparation, customer research and reporting, improving productivity and decision quality.
- Spotted operational bottlenecks and translated them into AI-enabled automation opportunities.
- Coordinated sales, production, logistics, finance and technical teams to deliver customer commitments; supported CRM adoption and contributed to pricing analysis.

Sales Support Manager – Commercial Reporting & Business Insights 03/2015 – 12/2017
Metsä Board | Finland

- Built Power BI solutions for commercial reporting, process transparency and operational decision-making.
- Supported pricing processes through SAP, analytics and reporting that improved pricing transparency.
- Improved data quality and reporting through automation and standardised workflows.
- Worked with Sales Managers to identify revenue opportunities and customer trends.

Business Process & Customer Success Coordinator 04/2008 – 04/2015
Metsä Board | Belgium / Finland

- Managed enterprise customer relationships, service delivery and retention.
- Coordinated cross-functional delivery and resolved complex commercial issues.

EDUCATION

Executive Education Diploma – Sales & Strategic Commercial Leadership
Hanken Executive Education, Finland 2025

Bachelor of Social Science (B.Soc.Sc.)
Faculdade de Letras da Universidade do Porto, Portugal 2004

CERTIFICATIONS & DEVELOPMENT

- Microsoft Power Platform Fundamentals (PL-900) and Power Platform Functional Consultant (PL-200): in progress.
- Certified Lean Six Sigma Green Belt | BPM Master Class.
- Advanced training in AI-powered automation, workflow orchestration, prompt engineering and APIs.
- 12-month structured AI development plan (Nov 2026 – Oct 2027); progress published openly at monopati.vercel.app/progress
